Volume 88

JOSEPH J. DISTEFANO III, BENJAMIN C. CHEN, AND ELLIOT M. LANDAW (Los Angeles, CA)
Pool Size and Mass Flux Bounds and Quasiidentifiability Relations for Catenary Models 1

C. C. A. M. GIELEN (Utrecht, the Netherlands), G. H. F. M. HESSELMANS AND P. I. M. JOHANNESMA (Nijmegen, the Netherlands)
Sensory Interpretation of Neural Activity Patterns 15

JOAN L. ARON (Baltimore, MD)
Acquired Immunity Dependent Upon Exposure in an SIRS Epidemic Model 37

A. T. DASH AND R. CRESSMAN (Ontario, Canada)
Polygamy in Human and Animal Species 49

YANG KUANG AND H. I. FREEDMAN (Edmonton, Canada)
Uniqueness of Limit Cycles in Gause-Type Models of Predator-Prey Systems 67

AMANDA L. GOLBECK (San Diego, CA)
Parity Progression in the Presence of Fetal Death: Transforming Central Rates into Probabilities 85

ERIC P. SALATHE (Bethlehem, PA) AND TSENG-CHAN WANG (Pasadena, CA)
Analysis of Transcapillary Osmotic Transients Following Exercise or Burn Injury 107

ANNOUNCEMENT 123

Elsevier

DAVID GREENHALGH (Cambridge, England)
Some Results on Optimal Control Applied to Epidemics 125
BRADLEY J. ROTH (Nashville, TN), FRANS L. H. GIELEN (Rotterdam, The Netherlands), AND JOHN P. WIKSWO, JR. (Nashville, TN)
Spatial and Temporal Frequency-Dependent Conductivities in Volume-Conduction Calculations for Skeletal Muscle 159
BRADLEY J. ROTH, WEI-QIANG GUO, AND JOHN P. WIKSWO, JR. (Nashville, TN)
The Effects of Spiral Anisotropy on the Electric Potential and the Magnetic Field at the Apex of the Heart 191
CHARLES J. MODE (Philadelphia, PA) AND TERRY ROOT (Princeton, NJ)
Projecting Age-Structured Populations in a Random Environment 223
